

FULL STACK SOFTWARE ENGINEER

Toulouse, Permanent contract, Full time, Starting date : ASAP

Delair

Delair is a world leader in professional UAVs and data solutions for Industries, Ag, Geospatial and Security. Its solutions revolutionize the way industries work with aerial digital data.

So far with customers in more than 80 countries, Delair's growth and expansion have been phenomenal.

By joining Delair you will do much more than just participate to the development of worldwide industrial drone solutions. You'll help many industrial companies make strategic decisions based on reliable & cost-efficient data.

Imagine a job you can enjoy while having an impact on a brand-new market. You can make a difference every single day as you develop and implement your ideas as part of a brilliant, cutting-edge company!

It is in technical excellence and perpetual innovation process that we recognize ourselves. This is why we encourage innovative ideas and incent our teams to develop their creativity.

As a young, energetic and highly motivated team, we work in a stimulating and pleasant working environment. Dedication and innovation are rewarding and rewarded, giving you a unique opportunity to gain valuable and challenging experience in a rapidly growing business with passionate and easy-going enthusiastic people.

Job description

Our cloud platform ingests large amounts of aerial images as raw material to produce maps, 3D models and business analysis. We work hard to provide our clients with powerful tools to access their data quickly and interact with them in real-time . Help us go further in this task.

Your missions

- Maintain and evolve our web-based application.
- Collaborate with the rest of the engineering team to design and launch new features.
- Maintain code integrity and organization.
- Work with graphic designers and converting designs to visual elements.

The Profile

Qualifications

- Engineering degree in Computer Science or equivalent combination of degree and relevant experience
- Solid software engineering skills (Data modeling, API)
- Javascript (with Typescript), HTML5, CSS3 (with SASS)
- MEAN stack (MongoDB, Express, Angular 5, Node.js)
- Continuous Delivery
- Linux environment

Pluses

- Redux with Angular 5 & ngrx 5
- Experience working with geospatial data and libraries (Openlayers, Three.js, etc.)

Mindset

- Agile mindset
- You're not freaked out by the ambiguity common in a startup.
- You can operate effectively at a fast paced company and embrace change.
- You are curious and pragmatic
