

## DELAIR DRONES

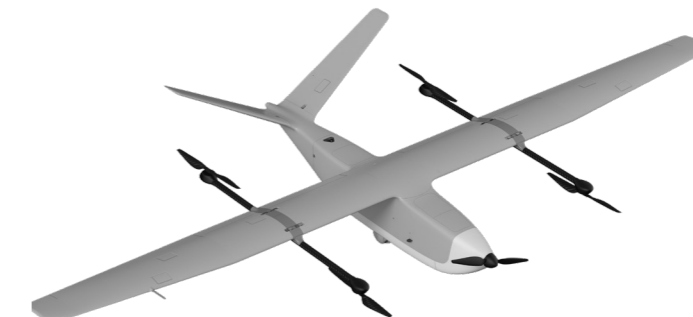

Our UAVs benefit from all the experience accumulated by Delair systems over more than 10 years in operational theaters: the ruggedness, reliability, aeronautical certification and stealthy that have made Delair's reputation, while offering a technological breakthrough that opens up new operational perspectives.

**UX 11 1H**  
Lightweight & Hand-launched

**DT 26 E 3H**  
Multimission ISR for long endurance

**DT 46 7H30**  
Multimission ISR with modular design for ultra long endurance

11 years of experience

100 000 flight hours

3M flight kilometers

Design for BVLOS

ARP4761 & DO178

Designed and  
made in France

"Aerial observations will be unmanned. The needs for aerial observations are booming, driven by the world's context : decarbonation, digital transformation, border tensions. The market is there. Already, a few actors have reached €300m+ revenues, but none of them is European."

Delair is one of the established leaders in Aerial observation vehicles, with a strong reputation of robustness and reliability, healthy financials, and a super skilled and experienced team, and aims to become the European leader of unmanned aerial observation vehicles for Industry, Security & Defence."

— Bastien Mancini - CEO

“ ... to become  
the  
European  
leader ... ”
